Understanding & Coding
Medicare Advantage Preventive Services

Annual Preventive Visits, ‘Welcome to Medicare’ Exams and Annual Wellness Visits
The Patient Protection and Affordable Care Act (ACA) waives the deductible and coinsurance/copayment for the Initial Preventive Physical Exam (IPPE) and the Annual Wellness Visit (AWV).\(^1\)

### Annual Preventive Visits

<table>

</tr>
<tr>
<td>G0439</td>
<td></td>
<td>Annual wellness visit, includes a personalized prevention plan of service (PPPS), <em>subsequent visit</em></td>
</tr>
</tbody>
</table>

Other Services Provided with the Exam

If you also bill other services with the routine physical exam and if those services are normally subject to a copayment or coinsurance, that copayment or coinsurance will still apply even if the primary reason for the visit was a routine physical exam.

**Lab Tests or other Diagnostic Services**

Lab tests or other diagnostic services ordered as a result of exam findings performed at the time of the routine physical may or may not be subject to a copayment or coinsurance, depending on your contract with the health plan.

Other Preventive Services (Screenings)\(^2,3\)

Providers may also provide and bill separately for screenings and other preventive services. Medicare Advantage plans cover the following Medicare-covered preventive services. (Please follow original Medicare coding rules when billing Medicare-covered preventive services, see https://www.cms.gov/mlnproducts/35_preventiveservices.asp.)

- Bone mass measurement
- Cardiovascular screening blood tests
- Colorectal cancer screening tests
- Diabetes outpatient self-management training (DSMT)
- Diabetes screening tests
- HIV screening
- Intensive Behavioral Therapy (IBT) for cardiovascular disease
- Intensive Behavioral Therapy (IBT) for obesity
- Medical Nutrition Therapy (MNT) services
- Pneumococcal, influenza and hepatitis B vaccine and administration
- Prostate cancer screening tests
- Screening and behavioral counseling interventions in primary care to reduce alcohol misuse
- Screening for depression in adults
- Screening for glaucoma
- Screening mammography
- Screening Pap smear and screening pelvic exam
- Tobacco-use cessation counseling services
- Ultrasound screening for abdominal aortic aneurysm (AAA) if patient qualifies for screening and screening is performed within first six month of enrollment.
- Additional preventive services identified for coverage through the national coverage determination (NCD) process

\(^1\) Please note, payment policies regarding the AWVs and the comprehensive preventive exams vary by plan. Please check with your contracted plan for further information prior to billing.

\(^2\) Slight exceptions may vary from plan to plan. Please check with your contracted plan for product variances. Certain eligibility and other limitations may apply.

\(^3\) For a complete list of services and procedures that are defined as preventive services under Medicare and which have waived coinsurance/deductible, see: http://www.cms.gov/mlnmattersarticles/downloads/SE1129.pdf and http://www.cms.gov/mlnmattersarticles/downloads/SE1136.pdf
“Welcome to Medicare” Exam

<table>
<thead>
<tr>
<th>Codes</th>
<th>Diagnosis Code</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>G0402</td>
<td></td>
<td>“Welcome to Medicare” initial preventive physical exam (IPPE) limited to new beneficiary during the first 12 months of Medicare enrollment</td>
</tr>
<tr>
<td>G0403</td>
<td></td>
<td>Electrocardiogram, routine ECG with 12 leads; performed as a screening for IPPE with interpretation and report</td>
</tr>
<tr>
<td>G0404</td>
<td></td>
<td>Electrocardiogram, routine ECG with 12 leads; tracing only, without interpretation and report performed as a screening for IPPE</td>
</tr>
<tr>
<td>G0405</td>
<td></td>
<td>Electrocardiogram, routine ECG with 12 leads; interpretation and report only performed as a screening for IPPE</td>
</tr>
</tbody>
</table>

Original Medicare covers an IPPE within the first twelve months of a beneficiary's Part B coverage. Also known as the “Welcome to Medicare” exam, this one-time visit has the following goals:

- Comprehensive review of a patient’s health
- Identification of risk factors associated with various diseases
- Early detection of diseases when outcomes are best
- Comprehensive review of a patient’s health
- Identification of risk factors associated with various diseases
- Early detection of diseases when outcomes are best

Note: Medicare covers a one-time ultrasound screening for Abdominal Aortic Aneurysm (AAA) for at-risk beneficiaries when a referral for the screening is received as a result of the IPPE from the ‘Welcome to Medicare’ Exam. However, the AAA screening is a separate service from the physical exam and is subject to radiology cost-sharing.

What is Included in “Welcome to Medicare” Exam

- A review of medical and social history
- A review of potential risk factors for depression
- A review of functional ability and level of safety
- An exam to include height, weight, blood pressure, body mass index (BMI), visual acuity, and other medically necessary factors
- Education, counseling and referral based on results of bulleted items above
- Education, counseling and referral for other preventive services
- Voluntary advance planning upon agreement with patient*

“Welcome to Medicare” Coding Tips

- The “Welcome to Medicare” exam is limited to one occurrence within the first 12 months of enrollment only.
- As of 01/01/2009, an EKG is no longer required with the IPPE.
- A provider performing the complete “Welcome to Medicare” physical exam and the complete EKG would report both HCPCS codes G0402 and G0403.
- If the EKG portion of the exam is not performed during the visit, another provider may perform and/or interpret the EKG.
- When a provider performs a separately identifiable medically necessary E/M service in addition to the “Welcome to Medicare” exam, CPT codes 99201-99215 reported with modifier -25 may also be billed. When medically indicated, this additional evaluation and management (E/M) service would be subject to the applicable deductible, copayment or coinsurance for office visits.

*Voluntary advance planning refers to verbal or written information regarding an individual’s ability to prepare an advance directive in the case where an injury or illness causes the individual to be unable to make health care decisions and whether or not the physician is willing to follow the individual's wishes as expressed in an advance directive.
### Annual Wellness Visit (AWV) with Personalized Preventive Plan Service (PPPS)

<table>
<thead>
<tr>
<th>Codes</th>
<th>Diagnosis Code</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>G0438</td>
<td>Any appropriate code is accepted</td>
<td>Annual wellness visit, includes a personalized prevention plan of service (PPPS), <em>first visit</em></td>
</tr>
<tr>
<td>G0439</td>
<td></td>
<td>Annual wellness visit, includes a personalized prevention plan of service (PPPS), <em>subsequent visit</em></td>
</tr>
</tbody>
</table>

#### What is Included in Initial AWV with PPPS
- Health risk assessment
- Establishment of medical/family history
- Establishment of list of current providers and suppliers
- Measurement of: height, weight, BMI, blood pressure, and other medically necessary routine measurements
- Detection of any cognitive impairment
- Review of potential risk factors for depression
- Review of functional ability and level of safety
- Establishment of a written screening schedule
- Establishment of a list of risk factors and conditions for which interventions are recommended or are underway and a list of treatment options and their risks and benefits
- Furnishing of personalized health advice and referral, as appropriate, to health education or preventive counseling services or programs, or community-based lifestyle interventions to reduce identified risk factors and promote self-management and wellness
- Voluntary advance planning upon agreement with patient*

#### What is Included in Subsequent AWV with PPPS
- Update of health risk assessment
- Update of medical/family history
- Update the list of current providers and suppliers
- Measurement of weight, blood pressure and other medically necessary routine measurements
- Detection of any cognitive impairment
- Update to the written screening schedule developed in the first AWV providing PPPS
- Update to the list of risk factors and conditions for which interventions are recommended or are underway based on the list developed at the first AWV providing PPPS
- Furnishing of personalized health advice and referral, as appropriate, to health education or preventive counseling services or programs
- Voluntary advance planning upon agreement with patient*

#### Annual Wellness Visit Coding Tips
- **G0438** is for the first AWV only and is paid only once in a patient's lifetime.
- G0438 and G0439 must not be billed within 12 months of a previous billing of a G0402, G0438 or G0439 for the same patient. Such subsequent claims will be denied.
- If a claim for a G0438 or G0439 is billed within the first 12 months after the effective date of the patient's Medicare Part B coverage, it will also be denied. A patient is eligible for only the “Welcome to Medicare” physical in the first 12 months of eligibility.
- When a provider performs a separately identifiable medically necessary E/M service in addition to the AWV with PPPS, CPT codes 99201-99215 reported with modifier -25 may also be billed. When medically indicated, this additional E/M service would be subject to the applicable deductible, copayment or coinsurance for office visits.

*Voluntary advance planning refers to verbal or written information regarding an individual's ability to prepare an advance directive in the case where an injury or illness causes the individual to be unable to make health care decisions and whether or not the physician is willing to follow the individual's wishes as expressed in an advance directive.*
Document how all active problems and ongoing chronic conditions are monitored, evaluated, assessed, and/or treated in the Section 17.

<tr>
<td><strong>“Pins and Needles” in Legs/Feet</strong></td>
<td>□ YES □ NO Duration:</td>
<td>□ YES □ NO Duration:</td>
</tr>
<tr>
<td><strong>Numbness (Lack of Feeling) in Legs and Feet</strong></td>
<td>□ YES □ NO Duration:</td>
<td>□ YES □ NO Duration:</td>
</tr>
</tbody>
</table>

**Other**

Patient with known: □ Diabetes □ Alcohol Misuse □ Nutritional Deficiency □ Other Disease:

Is the patient on: □ Dapsone □ Hydroxyurea □ Metronidazole □ Vincristine □ Thalidomide □ Isoniazid □ Linezolid □ Ribavirin

Exposure to Other Medications/Agent Known to Cause Neuropathy:

---

*Based on above screening, consider recording vibratory sensation in seconds, using a 128-HZ tuning fork during the physical examination.*

---

## SIX ITEM COGNITIVE IMPAIRMENT TEST

1. **What year is it?**
   - 0: CORRECT
   - 4: INCORRECT
   - □: SCORE

2. **What month is it?**
   - 0: CORRECT
   - 3: INCORRECT
   - □: SCORE

3. **Ask patient to remember the following address:**
   - John Brown - 42 West Street - Bedford
   *Make sure patient can repeat address properly and inform him/her that you will ask him for it later.*

4. **What time is it?**
   - 0: CORRECT
   - 3: INCORRECT
   - □: SCORE

5. **Count backwards from 20 to 1**
   - 0: CORRECT
   - 2: 1 ERROR
   - 4: 1+ ERRORS
   - □: SCORE

6. **Months of the year backwards**
   - 0: CORRECT
   - 2: 1 ERROR
   - 4: 1+ ERRORS
   - □: SCORE

7. **Repeat previous memory phrase (address in #3)**
   - 0: CORRECT
   - 3: 1 ERROR
   - 4: 2 ERRORS
   - □: TOTAL SCORE

**SCORING:**

0 - 7 Normal • 8 - 9 Mild Cognitive Impairment (consider referral) • 10 - 28 Significant Cognitive Impairment (refer)
## Functional Abilities / Activities of Daily Living (ADL)

**Instructions:** Choose the scoring point for the statement that most closely corresponds to the patient's current level of ability for each of the following 10 items. *Record actual, not potential, functioning.*

<table>
<thead>
<tr>
<th>Component</th>
<th>Score Options</th>
<th>Patient's Score</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Bowels</strong></td>
<td>0 = Incontinent or constipated (requiring enemata) • 1 = Occasional accident (once/week) • 2 = Continent</td>
<td></td>
</tr>
<tr>
<td><strong>Bladder</strong></td>
<td>0 = Incontinent, or catheterized and unable to manage • 1 = Occasional accident (max. once per 24 hours) • 2 = Continent (for over 7 days)</td>
<td></td>
</tr>
<tr>
<td><strong>Grooming</strong></td>
<td>0 = Needs help with personal care • 1 = Independent face/hair/teeth/shaving (implements provided)</td>
<td></td>
</tr>
<tr>
<td><strong>Toilet Use</strong></td>
<td>0 = Dependent • 1 = Needs some help but can do some things alone • 2 = Independent (on and off, dressing, wiping)</td>
<td></td>
</tr>
<tr>
<td><strong>Feeding</strong></td>
<td>0 = Unable • 1 = Needs help cutting, spreading butter, etc. • 2 = Independent (food provided within reach)</td>
<td></td>
</tr>
<tr>
<td><strong>Transfer</strong></td>
<td>0 = Unable (no sitting balance) • 1 = Major help (one or two people, physical), can sit • 2 = Minor help (verbal or physical) • 3 = Independent</td>
<td></td>
</tr>
<tr>
<td><strong>Mobility</strong></td>
<td>0 = Immobile • 1 = Wheelchair independent, including corners, etc. • 2 = Walks with help of one person (verbal or physical) • 3 = Independent (but may use any aid, e.g. stick)</td>
<td></td>
</tr>
<tr>
<td><strong>Dressing</strong></td>
<td>0 = Dependent • 1 = Needs help but can do about half unaided • 2 = Independent (including buttons, zips, laces, etc.)</td>
<td></td>
</tr>
<tr>
<td><strong>Stairs</strong></td>
<td>0 = Unable • 1 = Needs help (verbal, physical, carrying aid) • 2 = Independent up and down</td>
<td></td>
</tr>
<tr>
<td><strong>Bathing</strong></td>
<td>0 = Dependent • 1 = Independent (or in shower)</td>
<td></td>
</tr>
<tr>
<td><strong>SCORING:</strong></td>
<td>□ Significant Risk for Falls (Check if Mobility Score &lt;=2, Transfer Score &lt;=2, and/or Stairs Score &lt;=1)</td>
<td></td>
</tr>
<tr>
<td></td>
<td>□ Assess for Supervised Care (Check if Total Score is &lt;=15)</td>
<td></td>
</tr>
</tbody>
</table>

The index should be used as a record of what a patient does, *not as a record of what a patient could do.* The main aim is to establish degree of independence from any help, physical or verbal, however minor and for whatever reason. *The need for supervision renders the patient not independent.* A patient's performance should be established using the best available evidence. Asking the patient, friends/relatives and nurses will be the usual source, but direct observation and common sense are also important.

## Depression Screen

**Instructions:** Choose the best answer for how you felt over the past week.

<table>
<thead>
<tr>
<th>Question</th>
<th>Yes</th>
<th>No</th>
<th>Yes</th>
<th>No</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Are you basically satisfied with your life?</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>2. Have you dropped many of your activities and interests?</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>3. Do you feel that your life is empty?</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>4. Do you often get bored?</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>5. Are you in good spirits most of the time?</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>6. Are you afraid that something bad is going to happen to you?</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>7. Do you feel you have more problems with memory than most people?</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>8. Do you often feel helpless?</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>9. Do you feel that your situation is hopeless?</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>10. Do you feel happy most of the time?</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>11. Do you think it is wonderful to be alive?</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>12. Do you feel pretty worthless the way you are now?</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>13. Do you feel full of energy?</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>14. Do you prefer to stay at home rather than going out and doing new things?</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>15. Do you think that most people are better off than you are?</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

- No Breast Masses
- No Chest or Breast Nodules
- No Nipple Inversion
- No Axillary Nodes Bilaterally

**ABNL Exam Findings:**

**Abdomen Symmetrical**
- No ABNL Distention
- + Mass-Location:
- Percussion WNL
- Soft
- No Tenderness
- Scars Present
- Hernias Present
- Organomegaly
- Feeding Tube/Ileostomy/Colostomy

**Auscultation:**
- Check for bowel sounds present and for bowel sounds absent

**Rectal Exam Reveals:**
- Peri-Rectal Area NL to Inspection & Palpation
- Stool Brown
- Deep Palpation NL
- Stool Negative for Occult Blood
- Stool Positive for Occult Blood
- Int. or Ext. Hemorrhoid(s) present
- Sphincter Tone Poor

**ABNL Exam Findings:**

**GU**

**CVA Tenderness:**
- Absent Bilaterally
- Suprapubic Tenderness: Absent

**Male:**
- Prostate Exam NL
- Prostate Enlargement
- Tenderness
- Nodules

**Female:**
- Pelvic Deferred
- Pelvic Exam NL

**ABNL Exam Findings:**

### LYMPH
- Palpation of lymph nodes (note all that apply):  
  - Neck  
  - Axilla  
  - Groin  
  - Other Site  
  - No Lymph Node Enlargement Noted  
  - Lymphadenopathy Present:  
    - Anterior  
    - Cervical Posterior  
    - Cervical Postauricular  
    - Submental  
  - Supraclavicular Inguinal Axillary  
  - ABNL Exam Findings:  

### MUSCULOSKELETAL
- No Joint Abnormality  
- Joint Abnormality (please specify joint and abnormality):  
  - Kyphosis +/-  
  - Scoliosis +/-  
  - Prevertebral Tenderness  
- Osteoarthritis  
- Bouchard's Nodes Present  
- Heberden's Nodes Present  
- Paronychia Present  
- Swelling Present (please specify):  
  - Peripheral Joint Exam Findings:  
  - Central Joint Exam Findings:  
  - ABNL Exam Findings:  

### SKIN
- Skin Warm, Dry, Intact  
- Good Skin Turgor  
- Poor Skin Turgor  
- No Rashes  
- No ABNL Lesions  
- No Ulcers  
- Cyanosis Present  
- Diaphoresis Present  
- Nails:  
  - Foot Exam Reveals Callus Present  
  - Ulcers Present  
  - Type of Ulcer:  
  - Location:  
  - Stage:  
  - ABNL Exam Findings:  

### PSYCH
- Mood and Affect:  
  - NL  
  - Depressed  
  - Anxious  
  - Agitated  
  - ABNL Exam Findings:

| **Vaccination Schedule**             | **Pneumococcal** - Once after age 65 and if more than 5 years since last vaccination and/or uncertainty of vaccine status  
**Influenza** - Once per fall or winter season  
**Hepatitis B Vaccine** - Schedule course of vaccines if patient not previously vaccinated  
*additional shots if medically necessary | ___/___/___ | ___/___/___ |
| **Breast Cancer Screening (Mammography)** | **Annual screening mammography for all women aged 50-74 years** | ___/___/___ | ___/___/___ |
| **Colorectal Cancer Screening**      | **For ALL patients 50 and older:**  
- Annual fecal occult blood test or  
- Colonoscopy every 10 years or Flexible Sigmoidoscopy every 5 years  
- Lower Endoscopy to be performed more frequently, if advised by GI | Type of Screening:  
___/___/___ | ___/___/___ |
| **Cervical Cancer Screening**        | **Every 2 years for low-risk**  
or annually if: sexual activity began before age 16, more than 5 partners in a lifetime, history of STD, any abnormal PAP in the past 7 years, DES-exposure | ___/___/___ | ___/___/___ |
| **Prostate Cancer Screening**        | **Once every 12 months for patients age ≥50 includes:**  
- Digital rectal exam and/or  
- Prostate specific antigen test | Type of Screening:  
___/___/___ | ___/___/___ |
| **Cardiovascular Disease Screening Blood Tests** | **Asymptomatic patients: every 5 years**  
High-risk patients to be screened more frequently:**  
- Fasting lipid panel | Results: LDL-C___/___/___ | ___/___/___ |
| **Diabetes Screening Tests**          | **Eligible Tests: Quantitative Urine Glucose, GTT, HbA1c**  
Annually or every 6 months if previous diagnosis of elevated FBS, elevated HbA1c, or impaired GTT, or glucosuria | Type of Screening:  
___/___/___ | ___/___/___ |
| **Osteoporosis Screening**            | **Every 24 months in patients with at least one of the conditions below:**  
- In women who have had a long-bone or vertebral fracture should undergo assessment for osteoporosis and treatment of osteoporosis within 6 months of the fracture  
- Women who are estrogen-deficient and at clinical risk for osteoporosis  
- Patient with vertebral abnormalities identified by X-ray  
- Patient receiving, or expected to receive, glucocorticoid therapy equivalent to an average of ≥5.0mg of prednisone per day, for more than 3 months  
- Patient with known primary hyperparathyroidism | BMD Result:  
___/___/___ | ___/___/___ |
| **Glaucoma Screening**                | **Document name of physician who performed glaucoma screen:**  
All patients 65 years and older without a previous history of glaucoma should be screened. (Glaucoma Screen Reporting Requires Tonometry Results.) High-risk patients include:**  
- Diabetes  
- Family history of glaucoma  
- African-American ≥50 years of age  
- Hispanic-American ≥65 years of age | Results:  
___/___/___ | ___/___/___ |
| **Ultrasound Screening for Abdominal Aortic Aneurysm** | **One-time-only benefit within first six months of enrollment IPPE for following risk factors:**  
- Family history of AAA (Dx Z82.49)  
- Men age 65-75 smoked at least 100 cigarettes in their lifetime (Dx Z87.891) | Results:  
___/___/___ | ___/___/___ |

How can we help you?

Our goal is to help healthcare professionals facilitate and support accurate, complete and specific documentation and coding with an emphasis on early detection and ongoing assessment of chronic conditions. Through targeted outreach and education we help our clients and their providers:

- Deliver a more comprehensive evaluation for their patients
- Identify patients who may be at risk for chronic conditions
- Improve patient care to enhance longevity and quality of life
- Comply with the Centers for Medicare & Medicaid Services (CMS) risk adjustment requirements

Call your Optum Healthcare Advocate to find out how we can help you improve outcomes for your patients.

From the ICD-10-CM Official Guidelines for Coding and Reporting 2014 by the Centers for Medicare & Medicaid Services (CMS) and the National Center for Health Statistics (NCHS): "A dash (-) at the end of an Alphabetic Index entry indicates that additional characters are required. Even if a dash is not included at the Alphabetic Index entry, it is necessary to refer to the Tabular List to verify that no 7th character is required."

CPT is a registered trademark of the American Medical Association.

Please note, payment policies regarding the AWV and the comprehensive physical exam (CPE) vary by plan. Please check with your contracted plan for further information prior to billing.
